AN EXPERIENCED LEADER READY TO ADVANCE THE PROFESSION!

I am a huge proponent of the supply chain profession, and believe it is vital to the overall success and future of healthcare. I have been an advocate for AHRMM and a member since 1998. I feel a tremendous desire to serve and to help shape tomorrow's leaders. The advancement of this profession has been a career long commitment for me, and, I would be honored to continue this endeavor with the opportunity to serve on the AHRMM board.

My top priorities for supply chain:

1. Cost, quality, and outcomes must lead our endeavors to change the healthcare landscape.
2. Leadership Development through education must be at the forefront to ensure growth of our profession.
3. Recognition of the Supply Chain leader within the C-Suite.
4. Changing the game in supply chain process and progress.

Supply chain must continue to evolve as quickly as technology. An agile supply chain leader willing to change paradigms will succeed in the challenges of tomorrow.
