

Don Barton MBA/BSN/RRT – Candidate for AHRMM Advisory Board

- AHRMM Member since 2008
- 35 years in Healthcare
- Currently Chief Technical Officer & Director of Supply Chain Management
- Director of Supply Chain since 2007
- Previously Director of Cardio-Pulmonary Services, Surgery, Central Sterile, Emergency Department and Sleep Lab.
- Have served on the Board of Directors at the State level for AORN & HIMSS
- Current Member of AHRMM, AORN & AARC

Mission:

To serve others in the healthcare supply chain industry.

Goal:

To continue to advance and advocate for the profession by building on the success of those who have built AHRMM into what it is today. To continue to advance the initiatives around Cost, Quality and Outcomes (CQO) while also collaborating with other organizations in advancing initiatives that directly impact every one of us and those we serve by developing standards and tools that allow us to benchmark and perform at higher levels.

The work that AHRMM is doing around the Key Performance Indicators of Finance, Operations, Patient Safety, Resiliency, Data Standards and Environmental Sustainability are initiatives that we can all be proud of and that will continue to provide us tools and resources to better serve our organizations as well as our patients.

I would be honored to continue the work that others began and so I'm asking you to consider me for a seat on the Advisory Board for AHRMM.

Thank you:

It is members like you that take the time to review the candidates and cast their ballots that helps make AHRMM what it is. It is through your engagement and participation that our voices collectively speak louder for the benefit of everyone that works or is touched by the healthcare supply chain.
